Karla

Body 400 · Labels 500 · Buttons 600

Make the pitch feel like the product.

01 Start with the backgrounds

Use the 1920 × 1080 images as 16:9 slide backgrounds. Add editable text on top; keep the enso on the quiet side of the slide.

02 Keep the logo intact

Use the transparent silver logo on dark slides. Preserve its proportions and colours. Leave at least one small logo-square of clear space.

03 Choose real mobile views

Raw captures are 393 × 815 at 3× resolution. Phone frames are transparent PNGs. The overview is slide-ready. Chart results use sample birth details, not customer data.

04 Install the fonts

Install both Cormorant Garamond and Karla before editing in PowerPoint or Keynote. If your slide tool permits font upload, use the included TTFs. Their licences are included.

05 Keep the story honest

Use Cycles, Understanding and Alignment as brand convictions, not customer testimonials. The full app is coming soon; do not present future features as already available.
